

Project Guidelines for project guide

Project evaluation should be done according to following guidelines

The 45 marks will be converted to 20 marks as INTERNAL Marks.

Give separately 10 marks for the final demo. These marks will be considered in Final Examination in the 30 marks.

1. Internal Examiner will keep following mark lists ready before final examination
 1. Internal - 20 marks
 2. Final Demo - 10 Marks
2. Fill the respective table in the lab book of PHP.
3. Up to date information of progress report will be put in the lab book
4. The database design will be applicable to database related projects.
5. The Game based project will have the complete life cycle of that game along with Win and Loss conditions.
6. Draw applicable and relevant UML diagrams using any Open Source software to draw UML diagram. Attach printout of UML diagrams drawn using software in project report.

7. While appearing for practical examination (Lab -3), completed and assessed Lab book and project documentation must be with student.
