M.Sc. IMCA

----- About the Course -----

M.Sc. (Industrial Mathematics with Computer Applications) is the two years, fulltime program designed as per National Education Policy 2020 by considering the rapid changes in science and technology and new approaches in different areas of Mathematics and related subjects. The changing scenarios of higher education in India and abroad are taken into account to orient curricula towards the application of Mathematics and Computer Science in Research and Industry. The curriculum includes the subjects related to Industrial Mathematics, Core Computer Subjects as well as the Emerging Technologies in Computer Science. Theoretical courses help lay the foundation for developing logical thinking, while practical courses provide practical experience related to industrial requirements.

----- Why Choose MIT ACSC for M.Sc. IMCA ? -----

The course structure offered by MIT ACSC incorporates subjects related to the most advanced and latest developments in software and information technology. The curriculum includes in-demand courses such as python programming, android programming, and Django. Hence, it helps students upgrade their knowledge and understanding of the discipline. The institute has a history of producing outstanding software professionals who have found a place in top companies. The college collaborates with several companies that offer internships and campus placements to start their careers. The institute offers various skill development courses that help improve their skills and enhance their competence. These courses boost their confidence to face the real world through interactive sessions and hands-on training in several technical and personal skills.

----- Scope of M.Sc (IMCA) -----

- It provides students with the skills and knowledge they need to solve complex industrial problems using mathematical and computational tools.
- Adequate exposure to global and local concerns so as to explore many aspects of Mathematical Sciences.
- It develops relational understanding of mathematical concepts and structures with mathematical reasoning.
- It provides a platform for the application of mathematical skills and knowledge for societal issues.
- It develops the ability to write necessary algorithms & programs in different languages as per the need of the industry.
- It prepares students for research and development in industrial and engineering fields that use mathematical and computational methods.

Eligibility

Any graduate with Mathematics as a subject until 2nd year with 50% (45% for Reserved Category students as per Government of Maharashtra)marks can apply.

----- How to Apply ? -----

An eligible candidate has to apply directly to the college through the college admission application form. Visit the college website <https://apply.mitacsc.ac.in> to apply online.
