#### **Objectives of the committee:**

To design the mechanism that:

- evaluates Course Outcomes, Program Outcomes and Program Specific Outcomes of each student.
- generates the course attainment.
- Obtains the program attainment of every batch.

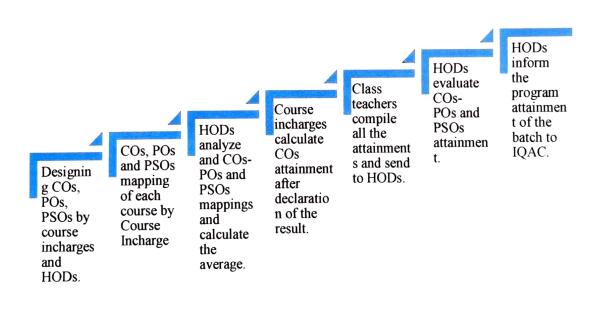

#### **Program Attainment Evaluation Policy**

A. Objective: This policy has been designed to ensure the evaluation of attainment of Course Outcomes(COs), Program Outcomes(POs), Program Specific Outcomes(PSOs).

**B. Description:** Program Attainment Evaluation Policy has been designed to frame a mechanism to assess the outcomes attainment of the courses, programs and specific programs run by the college. The college runs B.A., B. Com., B.B.A, B.B.A.-IB, B.B.A.-CA, B.Sc. (Regular), B.Sc.-C.S., M.Sc.-C.S. Programs. The attainment evaluation helps to get an idea about the success of teaching-learning process. It gives an overview of the strong areas as well as the areas that require improvement. It helps to achieve progress in the attainment level by planning and implementing suitable strategies. With this view Program Attainment Designing Committee has designed this policy.

#### C. Implementation procedure:

# 1. Designing Course Outcomes(COs), Program Outcomes(POs) and Program Specific Outcome(PSOs):

#### a. Introduction:

#### **Course Outcomes (COs):**

COs are statements that describe what students should be able to do at the end of successful completion of a course. Every Course leads to some Course Outcomes. CO statements are defined by considering the course content covered in each module of a course. The number of COs for each course differs from 1 to 8. These COs are numbered as CO1, CO2..... Blooms Taxonomy has been followed while designing COs. COs are miniatures of POs and PSOs. All COs jointly contribute to achieve the Programme Outcomes (POs) and Programme Specific Outcomes(PSOs). **Programme Outcomes (POs):** 

POs are what knowledge, skills and attitudes a graduate should have at the time of graduation. POs are statements that describe what the students graduating from any of the educational Programmes should be able to do. The number of POs for each programme differs from 1 to 8. These are numbered as PO1, PO2....

#### **Programme Outcomes (POs):**

PSOs are statements that describe what the graduates of a specific educational Programme should be able to do. The number of POs and PSOs for each programme differs from 1 to 8. These are numbered as PSO1, PSO2.....

COs, POs and PSOs demonstrate the vision and mission of the college.

#### b. Designing CO, PO and PSO:

Blooms Taxonomy has been followed while designing COs, POs and PSOs. Bloom's Taxonomy was created in 1956 under the leadership of educational psychologist Dr Benjamin Bloom. It describes six level of learning Knowledge, Comprehension, Application, Analysis, Synthesis, and Evaluation. The revised Blooms Taxonomy was published by Dr. Lorin Anderson, a former student of Bloom and his colleagues in 1999. It has also six levels but it takes into account a broader range of factors that have an impact on teaching and learning. These levels are remembering, understanding, applying, analysis, evaluation, creating. The content of each course is analysed according to these levels with the sesigning course outcomes. The action verbs listed in Blooms Taxonomy are preferably in Course of success and PSOs drafting.

**Step 1:** Programme Outcomes and Programme Specific Outcomes are designed by Head of the department(HOD) and course in-charges of respective programme.

**Step 2:** Course Outcomes are designed by Course in-charge of the respective courses offered in the programme and HOD.

Step 3: The designed COs, POs, PSOs are presented to Program Attainment Designing Committee.

Step 4: The committee finalizes the draft of COs, POs, PSO.

#### II. COs, POs and PSOs mapping of each course:

- Course in-charges prepare COs- POs and PSOs mapping for each course using following correlation:
  - ➤ 1: Slight Co-relation
  - ➤ 2: Moderate Co-relation
  - ➤ 3: Substantial Co-relation
  - > 0: No co-relation.
- The average of each course's co-relation is calculated.
- After this, COs- POs and PSOs mappings are sent to the head of the respective department.

#### Average of COs- POs and PSOs mapping of all courses in a program:

• The heads of departments (HODs) analyze COs- POs and PSOs mappings and calculate the average of all the courses of the programs. This is seen as the attainment of COs-POs and PSOs.

**III. COs Attainment:** COs attainment is calculated after the result declaration of each semester/annual examination. Final marks obtained in each CO are considered as the base for calculation.

- Target for attainment in each CO is ≥ 40% marks in that course as the passing criteria of SPPU for a course is ≥ 40%.
- Course in-charges prepare COs attainment sheets for each course using following correlation:
  - > 1: Target attained

- > 0: Target is not attained
- After this, course in-charges send COs attainment to the respective class teachers.
- Class teachers compile all the attainments and send it to the head of respective department for further process.
- HODs calculate the average of all COs attainment of each student for the respective programs.

IV. Evaluation of COs-POs and PSOs Attainment: HODs evaluate COs- POs and PSOs attainment.

- 40% of COs- POs and PSOs average attainment is calculated.
- If student attainment is ≥ 40% of COs- POs and PSOs average attainment then 1 is assigned otherwise 0.
- The average of the above calculation is converted into percentage. This is the program attainment of the batch.
- HODs inform the program attainment of the batch to IQAC.
- The pervious batch attainment is compared with current batch attainment to plan teaching-learning strategies for further progress.

Recording of data: HODs maintain the following data.

- Students' batch-wise enrolment data.
- Course syllabus.
- COs, POs and PSOs.
- Mapping of COs-POs and PSOs with correlation factor.
- Final marks entry.
- Mapping of COs attainment.
- Mapping of student's attainment.
- Mapping of student's attainment with COs- POs and PSOs attainment.
- Program attainment
- **D.** Applicability: This policy is applicable to all the programs run by the college.

# **CO Attainment:** CO attainment has been coulated from final marks obtained in each CO ter the result declaration of each semester/annual examination.

Target for attainment in each CO is  $\geq 40\%$  marks in that course because the passing criteria of SPPU for a course is  $\geq 40\%$ .

#### If student attainment is equal to greater than 40%, 1 is marked and if it is less than that 0 is marked.

CO Attainment: CO attainment has been calculated from final marks obtained in each CO after the result declaration of each semester/annual examination.

Target for attainment in each CO is  $\geq$  40% marks in that course because the passing criteria of SPPU for a course is  $\geq$  40%.

## If student attainment is equal to greater than 40%, 1 is marked and if it is less than that 0 is marked.

	It student attainment is equal to gre			,			6- 17

STEP II: 40% of CO-PO, PSO Mapping average is calculated.

40% of 2.30 = (40 X 2.23)/100=0.920

If student attainment is equal to greater than 0.920, 1 is marked and if it is less than that 0 is marked.
