

Dear Sir/Madam,

Dept. of Electronic Science, MIT ACSC, Alandi and The High Voltage Club Present "LoRa: The future of IoT" A special webinar for students, faculty members and STEM enthusiasts.

This webinar will help you to learn different aspects of IoT such as infrastructure, protocols, industrial needs, projects based on LoRa. LoRaWAN is a low power wide area network (LPWAN), developed to connect Internet of Things (IoT) devices and sensors for mass deployment. LoRa is a novel technology that helps devices to transmit and receive data with insignificant power consumption resulting in extended battery life

Accompany us on *July 11, 11:00 AM* for the webinar.

Certificates will be awarded to all participants.

Registration is FREE
