Master of Commerce

Master of Arts-Mass Communication and Journalism

Certificate Course in German

Overview of NEP 2020

Education is the penultimate instrument that can bring progressive changes in society, and the National Education Policy 2020 will bring significant transformation in the education field. India will have the highest population of young people in the world over the next decade, and the comprehensive attempt to provide high-quality educational opportunities to all citizens will ensure our country's progressive and prosperous future. National Education Policy 2020 envisions an education system rooted in Indian ethos that contributes directly to transforming India (Bharat) sustainably into an equitable and vibrant knowledge society by providing high-quality education to all, thereby making India a global knowledge superpower. The Policy envisages that the curriculum and pedagogy of our institutions must develop among the students a deep sense of respect towards the Fundamental Duties and Constitutional values, bonding with one's country, and conscious awareness of one's roles and responsibilities in a changing world. In order to convert the education policy into an implementable framework for the higher education institution's a workshop is being organised (make meaningful connection) in which the Eminent Academician would deliberate on the way forward in the implementation of the NEP-2020. This national workshop attempts to share and discuss the applicability and implementation of NEP 2020 effectively in educational institutions across India.

Objectives

The workshop aims to achieve the following key objectives:

- To explore to generate a new system that is associated with 21st-century education while building upon India's traditions and value systems.
- To explore opportunities for developing a multidisciplinary education system in the NEP 2020.
- To progress understandings into the various features of the NEP 2020-promotion (relate point) of research, faculty enhancement, internationalisation, technology, online education, vocational, professional education etc.
- To develop understanding among participants about access, equity, quality and inclusion as the underlying principles of the policy.
